Environmental club created decorative items under 'Best of Waste'
Theme and maintained greenery

It was mandatory for the student to study a subject environmental study in the all graduation programs. In which they had to appear in the university examination in the form of theory and practical. A project file was made under practical and work is done to make the environment green and clean. Under this, during the session 2021-22, for the beautification of the college, groups of 5 to 5 girl students have been made and the girl students were motivated for crafting from the waste material under 'Best of Waste' theme so that they would be inspired to create useful decorative items from the waste material and put them in pots. With this practice, students can also make it a means of employment in future. It can also be used in home decoration as well. Under that practice by the girl students many useful and decorative items were made from waste materials.

Under this club, the girl students were also motivated to preserve the environment, in which the girls also protect the plants planted in the college and help in watering. They also prepared organic fertilizer by decomposing the wet waste coming out of the college in a pit which is used for the nutrition of plants.
