

Environmental club

It is mandatory for the student to study a subject environmental studies in the course, in which they have to appear in the examination in the form of theory and practical. A project file is made under practical and work is done to make the environment green and clean.

Under this, for the beautification of the college, groups of 5 to 5 girl students have been made and put them in pots. And in the session 2019-20 LE 2020-21, the girl students were motivated to craft the waste material so that they would be inspired to make useful items from the waste material. With this practice, students can also make it a means of employment in future. It can also be used in home decoration as well. Under that practice by the girl students approx 78 Useful and decorative items are made from waste materials. Under this club, the girl students are motivated to preserve the environment, in which the girls also protect the plants planted in the college and help in preserving the wet waste coming out of the college in a pit. Which is used for the nutrition of plants.
